

Laura Ixchel Carbajal Jimenez.

Correo: laura.carbajal9912@alumnos.udg.mx \ Teléfono: 3317444593

Informatics Engineering student with hands-on experience in multi-platform QA testing, bug lifecycle management, and cross-functional collaboration between operations and engineering teams. Skilled in identifying, documenting, and communicating issues across web and mobile environments. Proven ability to bridge business needs and technical realities — a natural fit for owning end-to-end ticket workflows, driving prioritization, and accelerating resolution times in fast-paced product teams.

Work experience

Systems Analyst & QA Tester | [Intela \(Nommy\)](#)

August 2025 – Present

- ▶ Led end-to-end bug discovery and testing across 4 web apps and 1 mobile application — identifying, categorizing, and verifying issues through the full lifecycle.
- ▶ Owned bug and improvement documentation, ensuring engineering teams received clear, reproducible reports with severity and impact context to accelerate resolution.
- ▶ Partnered with product and engineering teams to plan and document future platform implementations, aligning quality standards with business objectives.
- ▶ Acted as a bridge between operations and tech: provided structured feedback that drove prioritization of critical user-facing issues.
- ▶ Provided bilingual technical support for an HR system, resolving user-reported incidents and escalating systemic issues with detailed diagnostics.
- ▶ Developed 5 landing pages and 1 full website using React and JavaScript, contributing to UX consistency and quality assurance at the front-end level.

Bilingual Technical Support Specialist | [Beliveo](#)

January 2023 – February 2024

- ▶ Delivered phone-based technical support in English for home security systems serving customers in the US, resolving hardware and connectivity issues end-to-end.
- ▶ Documented recurring failure patterns and escalated systemic bugs, contributing to knowledge base improvements and reduced repeat-contact rates.

Education

B.Eng. Informatics Engineering | [Universidad de Guadalajara](#)

August 2023 – June 2027

Skills

- **QA & Testing:** Bug lifecycle management (report → verify), cross-platform testing (web & mobile), test case design & documentation, UX issue identification & prioritization and technical ticket ownership.
- **Technical:** Python, React, JavaScript, TypeScript, SQL, Git, Trello, Office Suite, Google Cybersecurity fundamentals
- **Languages:** English – Advanced (C1) | German – Intermediate (B1) | Spanish – Native
